### Aries

#### **Love & Relationships**

This is not the year to go it alone. Team work and friendships, especially those forged with the creative, eccentric types are destined to develop during this year. These unusual relationships will have an enriching effect on you, inspiring you to face challenges ahead and motivate you in the acquisition of your goals. Now let's get down to the business of love, if you want to attract the object of your desire or inject some romance into an existing relationship do so when Venus, planet of love enters your sign on February 2<sup>nd</sup>. Venus will travel backwards from March 6<sup>th</sup> so you may be going over old ground with an ex or relationship issues that you have encountered in the past. Solutions for these problems will occur once this planet moves forward on April 24<sup>th</sup>. Saturn, planet of responsibility, will enter your relationship zone for a lengthy duration on October 29<sup>th</sup>. Close personal relationships will be complex and not without a few clashes, but what develops from this will be a deeper commitment and a stronger union for the future.

#### **Career & Finance**

Power and force from planet Pluto rumbles underneath the surface in the career and status sector and won't make its full blown upsurge until a few years time. Ambitions are aroused, energy is fired up and you are instilled with the drive to achieve your goals. Your time has now arrived to make your mark. However don't be too impetuous or become too intense in your desire to have it all now. Upheavals and transformations are par for the course so you are going to have to ride some storms in the future in a pressure cooker atmosphere and contend with those in authority, however, try not to get your fiery back up! Money looks buoyant this year and assistance or partnerships with associations should prove profitable. There is of course the dilemma in balancing your hectic work and home life, a constraint that you will have to forward plan if you are to have some sense of stability this year.

#### **Health & Happiness**

Don't bite off more than you can chew is a word of advice for this year! With your energetic enthusiasm and vigour you often take on far more than you can handle. Saturn, planet of limitations, was in your sector of work and health for the past year which has sapped your strength, so you now need to pace yourself. Don't go around blowing any fuses and causing a commotion as there may be no turning back. Remain calm in the face of adversity and perhaps resist a struggle. Try a little deep breathing or walking around the block when the temperature starts to rise! All in all another action packed year for you but certainly nothing that you cannot handle. Expansion and opportunity are yours for the taking. Support will come through close associates and colleagues to assist you through the mine field ahead.
