February 2010 – Month of Aquarius

Finally the year begins to pick up pace, after a go slow in the early part of January. However changes still lie beneath the surface, yet to be revealed or to put into action. Mars the planet of movement in backward motion, slows us down until early March. We are tentative and unsure if we should take action, second guessing on our instincts rather than acting upon them. Projects that have been on fast track are stalled and we are forced to re-assess and find a more streamlined approach.

February 14 begins the Chinese New Year of the Metal Tiger, the sign of power and bravery. The Tiger year will give you the drive and the daring to win over stiff competition, but of course not without a roar or a battle. 2010 is all about facing one's fears, taking a risk, and putting yourself out there regardless if you may get eaten alive in the jungle of life.
